Dear Congressman Bell:

What is the factual basis for Craig Hosmer's "zone of undetectability"? Seismographers here and in Japan have issued reports which say that nuclear explosions underground are clearly distinguishable from earth tremors. Could you send me the Hosmer material.

Have just returned from Bodega Bay where the local people are anxious, to say the least, about the Nuclear Reactor being imposed on their community by the AEC which, incidentally is pumping a hell of a lot of money into the University of California, and I'm against that kind of centralized buying up of state institutions, and now I hear that Malibu is going to get a similar stiff arming by the AEC. Malibu citizens are going to howl bloody murder and I'd like to get your thinking on this matter and whatever factual material you can send--or is this another matter where the AEC thinks the American constituency is too stupid to be given the facts?

RECEIVED

Cordially,

Richards L. Ho...
