07 JUL 14 A 9: 03

Dear Mr. Wright:

Kindly refer to Mail control #251651

In this letter, dated 24 June 1987, I requested an amendment for changed location of our radioactive source to a new address.

As per our telephone conversation on Tuesday, July 7, 1987, I am also requesting that our current license be modified with respect to condition #11 so that a physician need not be physically present in the scan room or suite whenever a dual or single photon is performed.

During our recent on-site review by Ms. Sandra Waldron, she recommended that we apply for the above mentioned modification.

We plan to physically move our location of radioactive source by the end of July, 1987 and much appreciate your help with expediting this request.

Sincerely,

Robert S. Neff M.D.
