

DLR:CTE
Docket No. 50-205

JUL 16 1963

Miss Ernestine I. Smith
1524 Fair Oaks Court
Santa Rosa, California

Dear Miss Smith:

This replies to your letter of May 26, 1963 addressed to Chairman Seaborg and enclosing a copy of your letter to the Secretary of the Interior in which you expressed concern with respect to the proposed construction of a nuclear power reactor at Bodega Head, California particularly regarding the proximity of the proposed site to the San Andreas Fault.

At the Commission's request, the U. S. Geological Survey has been conducting a thorough field study of the geology of Bodega Head since early May. In addition, expert consultants have been retained to assist the AEC Regulatory Staff in evaluating Pacific Gas & Electric Company's application with respect to the seismology of the area and structural design of the proposed plant. Final action on the Pacific Gas & Electric Company application will not be taken until the report by the U. S. Geological Survey has been received and evaluated. Further, a construction permit will not be issued unless the Commission, following a public hearing and a decision by the Atomic Safety and Licensing Board and consideration of all factors bearing upon safety is convinced that the facility can be constructed and operated at the proposed location without undue risk to the health and safety of the public.

Enclosed is a pamphlet which describes the procedures relating to the licensing of power reactors by the Atomic Energy Commission. The public will be given thirty days notice of the date of the public hearing to be held at Santa Rosa in this matter through a notice published in the Federal Register. In addition, a public announcement will be issued.

We feel confident that these procedures and their provision for public hearing will enable all interested persons to acquaint themselves with the details of Pacific Gas & Electric Company's
