

DEC 7 1967

Dr. S. Levy  
Nuclear Energy Division  
General Electric Company  
175 Curtner Avenue  
San Jose, California 95125

Dear Dr. Levy:

We have received a copy of your report, "General Electric - BWR Stability and Dynamic Performance," on nuclear-hydraulic stability of boiling water reactors. As we have agreed previously, this subject will be discussed between your organization and the AEC staff so that a final report can be prepared which will serve as a reference for use in the review of future applications.

We have begun our review of this document and anticipate that we will be in contact with you in January of 1968 to arrange for further discussions.

Sincerely yours,

151

Peter A. Morris, Director  
Division of Reactor Licensing
