

December 3, 1987

Carlton Kammerer, Director
State, Local, and Indian Tribe Programs
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Kammerer:

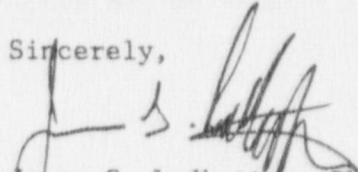

Thank you for your letter of October 22, 1987, concerning the review and evaluation of Georgia's Radiation Control Program conducted by Mr. Richard L. Woodruff on September 2, 1987. His recommendations and comments were useful and appreciated. I am pleased to know that the review found our Radiation Control Program adequate to protect the public's health and safety and that it was also compatible with the Commission's program.

Our revised Rules and Regulations for Radioactive Materials, Chapter 290-5-23, have been printed and distributed since Mr. Woodruff's review.

I have asked Mr. Thomas E. Hill, Acting Director of the Radiological Health Section, to respond to the technical comments in your letter. You should receive a response from him within the next 30 days.

If I may be of further assistance, please let me know.

Sincerely,

James G. Ledbetter, Ph.D.
Commissioner
