Lafayette, IN. 47902

November 2, 1973

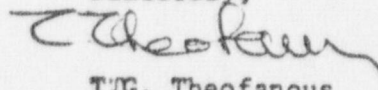

Mr. J.C. McKinley
Senior Staff Assistant
Advisory Committee on Reactor Safeguards
U.S. Atomic Energy Commission
Washington, D.C. 20595

Dear Mr. McKinley:

Following the Grand Gulf Subcommittee meeting at Los Angeles, this is my brief concluding statement:

1. I believe further discussion is needed for each one of the points I raised in my October 12 letter.
2. The scope of my previous discussion concerning ATFS should be enlarged to include lower probability initiating events (i.e. small breaks) and coupled with failure of active components.

Sincerely,

T.G. Theofanous
Associate Professor of
Chemical Engineering
