Chairman Glenn T. Seaborg
Atomic Energy Commission
Washington, D.C.

DOCKET NO. 50-205
(suppl)
L&R File Copy

Dear Sir:

We wish to add our voices to the many here in Sonoma County and California, to urge you to defeat the proposal for an atomic power reactor at Bodega Bay, Sonoma County, California.

It is not that we are opposed to P.G. & E., power plants or even nuclear reactors. Our position is that we do not want any reactor fouling and blighting the unique beauty of Bodega Head. When this lovely Bay and Head are defaced by these ugly plants, and they are ugly as we have seen them, their unusual beauty can never be replaced.

Then there is the danger of this reactor being built so near the very active St. Andreas Fault. Can any say there is positively no danger? If so, do they really know?

We are watching for the announcement by the Atomic Energy Commission of the hearing to be held in Santa Rosa, California in the near future.

Sincerely yours,

Victor Sabin

Gustava M. Sabin

Mr. & Mrs. Victor Sabin
