Docket No. 50-205

Mr. Leonard Murphy  
Chief, Seismology Branch  
U. S. Coast & Geodetic Survey  
Department of Commerce  
Washington 25, D. C.

Dear Mr. Murphy:

Enclosed for your information is a copy of Amendment No. 7 to the Pacific Gas and Electric Company application. This amendment sets forth further details with regard to the earthquake design criteria for the Company's proposed Bodega Bay reactor.

As you know, we plan to provide a report on the adequacy of the criteria discussed in Amendments 6 and 7 to the ACRS for consideration at its May 1964 meeting. A meeting will be held on April 14 in Bethesda to discuss this matter.

Sincerely yours,

Original Signed by  
E. G. Case

Edson G. Case  
Acting Director  
Division of Reactor Licensing

Mr. E. R. Price, Assistant Director  
Division of Licensing and Regulation  
The United States Atomic Energy Commission  
Washington 25, D. C.

Subject: Pacific Gas & Electric Co  
Application for nuclear plant on  
Bodega Head.

Dear Mr. Price:

Since there is so much speculation as to the results of construction of this proposed installation on the residents of Bodega Bay, we believe you may be able to settle one vital question.

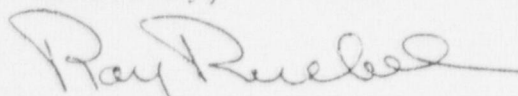

What would be the exclusion area (1) after installation of one reactor, and (2) after installation of a total of three or four reactors?

1. Could the Federal Channel at the entrance to Bodega Harbor be closed at any time? That is in the case of a nuclear accident at the plant, or at times of changing the fuel core? Any other circumstance?
2. Would the U. S. Coast Guard Station on Doran Park come within the exclusion area?
3. Would there be any circumstance that would result in evacuation of the town of Bodega Bay?

It is probable that if we are informed the distance of the exclusion area, and the reasons for which it is put in effect, we would then have sufficient information for our townspeople.

Your co-operation will be appreciated.

Sincerely,

Ray Ruebel,  
Secretary-Manager
