MEMORANDUM FOR: Files

FROM: C. James Holloway, Jr., Chief
License Fee Management Branch, RM/A

SUBJECT: FEE FOR NEW LICENSES ISSUED BY NMSS/
REGIONS FOR ADMINISTRATIVE REASONS

The NMSS materials license numbering system is designed to use a numerical state code as the first two digits of the license number. If a licensee moves to a different state, the Licensing staffs issue a new license in order to accommodate the state code appropriate for the new address, and the original license is terminated. If a licensee moves within a state, the existing license is amended. In both cases, an amendment fee is assessed in accordance with 10 CFR 170. An amendment fee is assessed when a new license is issued for the interstate move because

1. the Licensing staffs have informed us that the new licenses are issued to administratively maintain the correct state number designation for the licensee's new address, and
2. the technical review effort required to issue the new license for the interstate move is the same as that required to amend an existing license to reflect a licensee's intrastate move.

Therefore, the correct fee for the issuance of the new license is the appropriate amendment fee for the fee category or categories assigned to the original license, except as follows:

1. If the licensee requests an amendment to upgrade the scope of the licensed program in addition to a change of address, the appropriate application fee is required for the category being requested;
2. If the address change is for mailing purposes only and does not affect the authorized place of use, and if no other changes are requested, a fee is not required in accordance with William O. Miller's October 30, 1980 memorandum to Vandy Miller; and
