Re: Mail Control No. 11607

Dear Mr. Mullauer,

The following is in reply to your letter of July 9, 1982, requesting additional information:

Item 13 - Description of facilities and equipment

The source is part of an Ohmart density measuring device which is used for measurement of potassium chloride brine specific gravity. The unit is mounted on an 8 inch brine line in an area remote from working areas of the plant. Attached is a drawing showing the location of the source.

Item 15(a) - Name of company who will provide servicing operations.

Any servicing operations will be done by the supplier of the device, the Ohmart Corporation.

Item 15 (b) - Means of controlling access to the device.

The device is in a remote and inaccessible location (see attached drawing). Access to the device requires the use of a man-lift. In addition, warning signs are posted in the immediate area of the device.

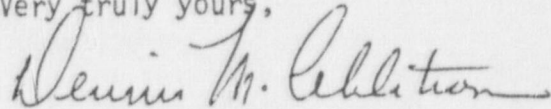

Item 15(c) - Lock-out procedures

If the device is to be serviced, the shutter will be closed, bolted and "tagged off" until work is completed. This procedure will be supervised and enforced by Clarence P. Baugher, Radiation Protection Officer.

I hope the above information is sufficient and apologize for not providing it on our initial application. If you have any questions, please feel free to call.

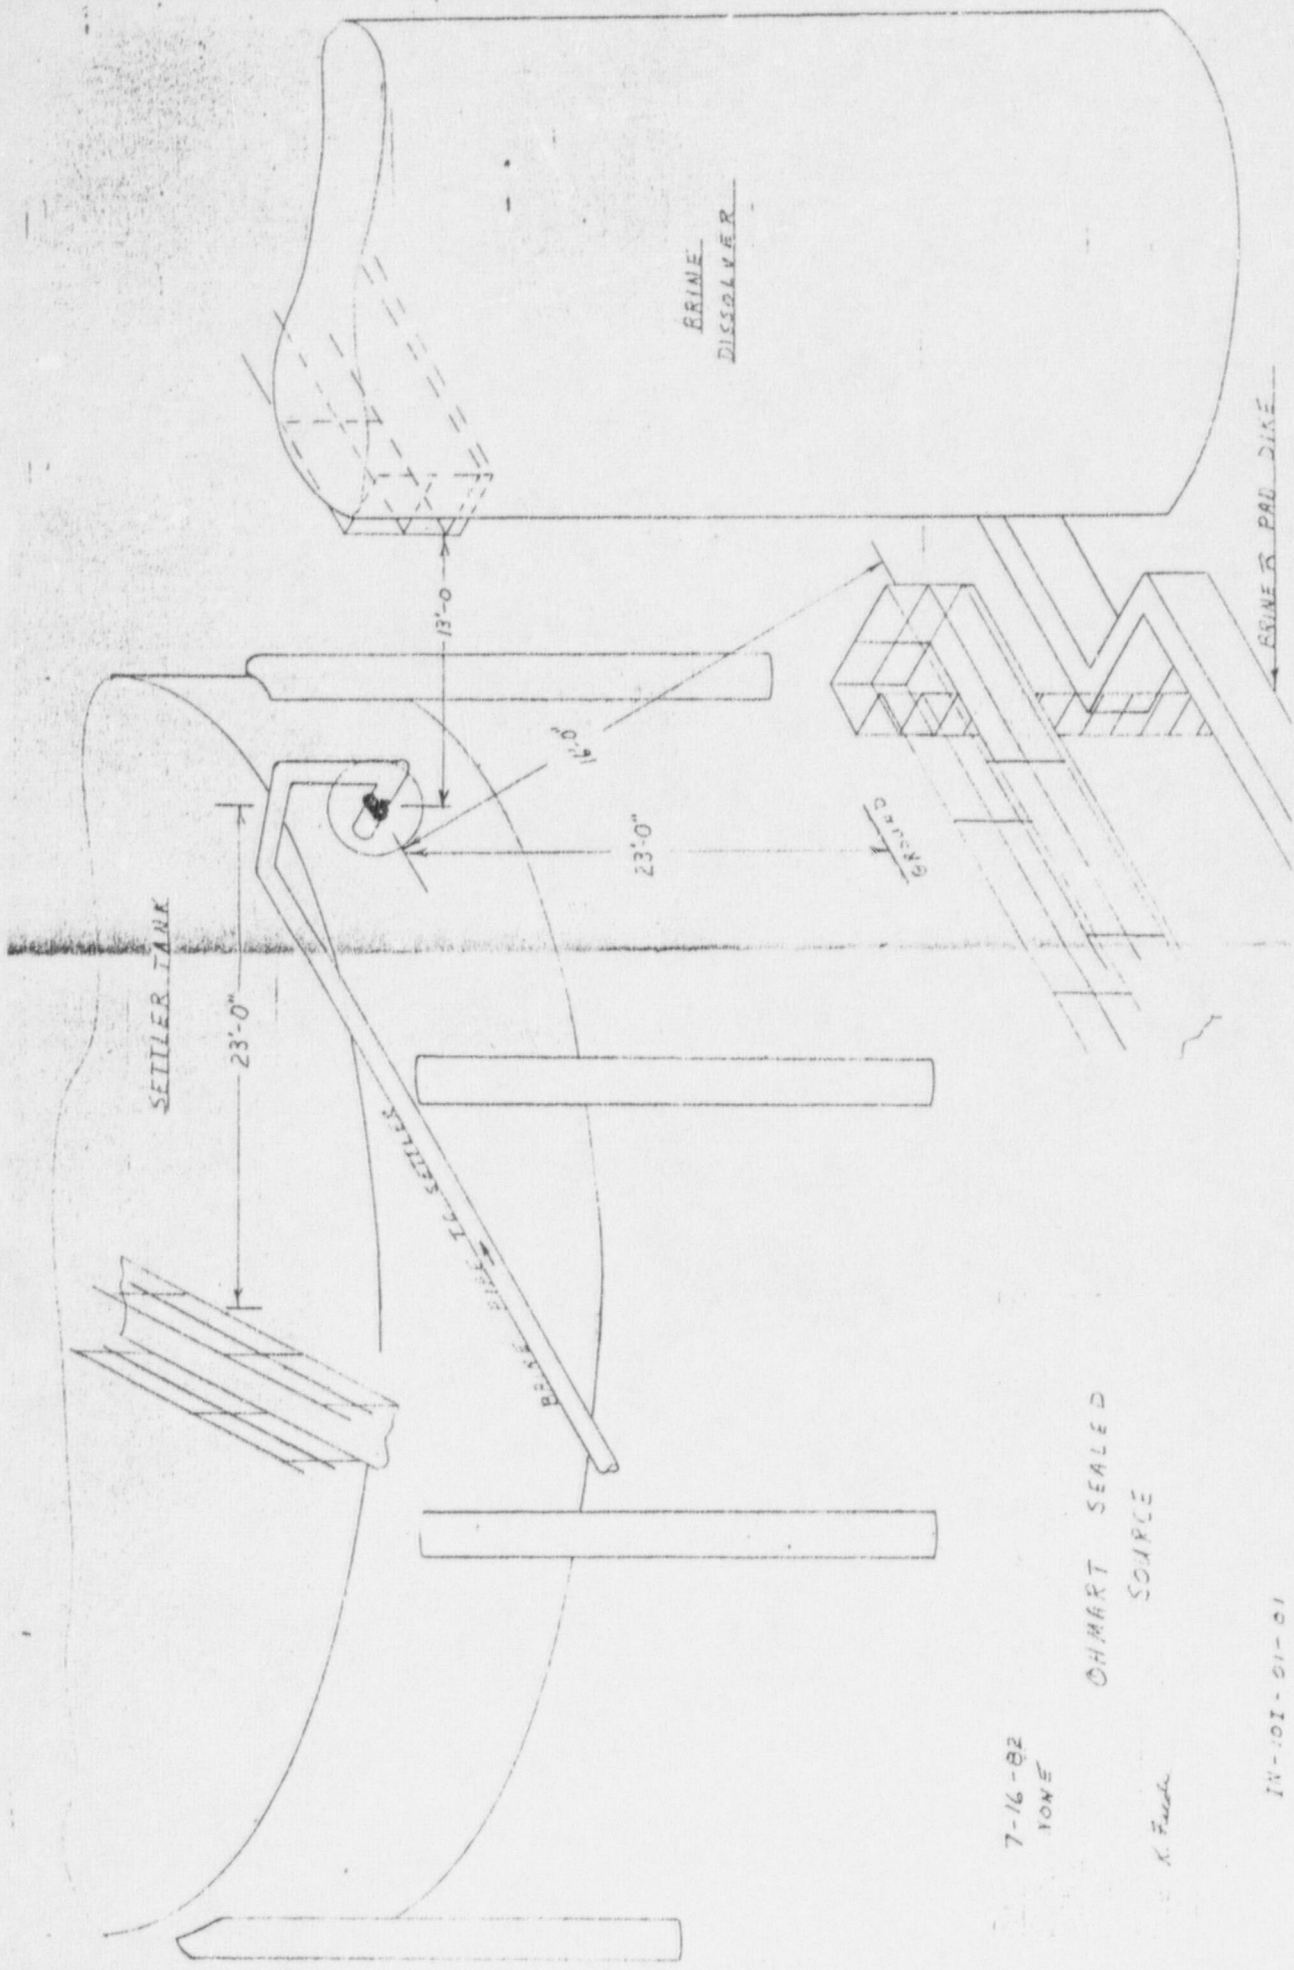

Very truly yours,

A handwritten signature in cursive script, appearing to read "Dennis M. Ahlstrom".
