Washington, D. C. 20555

Gentlemen:

River Bend Station - Unit 1
Refer to: Region IV
Docket No. 50-458/86-27

This response supplements Gulf States Utilities Company's (GSU) letter dated January 21, 1987, concerning the Notice of Violation contained in NRC Inspection Report No. 50-458/86-27.

GSU had previously committed to review surveillance test procedures (STP) for data transfer problems and incorporate necessary revisions by July 1, 1987. All reviews of STP's with a potential for this type of problem have been completed. Revisions of STPs in which potential problems were discovered have been completed with the exception of Instrumentation & Controls (I&C) procedures. Problems identified in I&C procedures will be monitored until their revision is completed on September 15, 1987.

Sincerely,

J. E. Booker
Manager-River Bend Oversight
River Bend Nuclear Group
