Dr. Clifford K. Beck Deputy Director of Regulations BETH-016 U. S. Atomic Energy Commission Washington, D. C. 20545

SUBJECT: Transmittal of GE-APED Topical Reports

Dear Dr. Beck:

We have mailed to you in a separate package 40 copies of a recently revised GE-APED report. This document, APED-4851, "General Electric Boiling Water Reactor Ceneral Core Startup Test Procedure", is the topical report for the BWR seminar scheduled for November 30, 1965 on core startup test programs. This seminar was mentioned in the letter to you from Mr. G. White, dated October 12, 1965.

This report contains information considered proprietary to the General Electric Company and is being transmitted to you for distribution within Atomic Energy Commission only for the purpose of the planned seminar. Please distribute copies to those who will attend the seminar; we hope that everyone will have time to read the report prior to the seminar.

Very truly yours,

W. R. Kanne, Manager Core & Fuel Engineering
