Mr. A. Philip Bray
Manager, Systems Engineering
Nuclear Energy Division
General Electric Company
175 Curtner Avenue
San Jose, California 95125

Dear Mr. Bray:

Thank you for your letter on probabilistic assessment of risk for reactors.

We are very much interested in this technique as it can be applied in the regulatory process and welcome your generous offer to help us understand the capability and utility, as well as the limitations, of the technique.

I look forward to discussing this matter further with you on August 5, 1969, in Bethesda.

Sincerely,

Peter A. Morris, Director
Division of Reactor Licensing
