SUBJECT: GENERAL ELECTRIC TOPICAL REPORTS

To bring you up to date on which GE Topical Reports have already been received or are expected in the very near future I offer the following list:

- have*
- ✓ 1. APED-5446 - Control Rod Velocity Limiter.
  - ✓ 2. APED-5453 - Vibration Analysis and Testing of Reactor Internals.
  - ✓ 3. APED-5450 - Design Provisions for In-Service Inspection.
  - ✓ 4. APED-5447 - Control Rod Worth Minimizer.
  - ✓ 5. APED-5286 - Design Basis for Critical Heat Flux Condition in Boiling Water Reactors.
  - ✓ 6. TR67SL211 - An Analysis of Turbine Missiles Resulting From Last-Stage Wheel Failure.
  - 7. 7RDB144A - Impact Testing on Collet Assembly for Control Rod Drive Mechanism (distribution copies of this report not yet received).
  - 8. APED-5608 - General Electric Company Analytical and Experimental Program for Resolution of ACRS Safety Concerns (distribution copies of this report not yet received).

All of these reports have been (or will be) placed in the Public Document Room and sent to the ACRS and ASLB members.

There are three or four more Topical Reports in preparation. As soon as these are identified I will pass the information on to you.

Addressees:

M. Mann, REG  
 P. A. Morris, DRL  
 F. Schroeder, DRL  
 E. G. Case, RS  
 S. Levine, DRL  
 D. Skovholt, DRL  
 RP Branch Chiefs

Ray Fraley, ACRS  
 OGC  
 Stan Robinson, SECY  
 R. Engelken, CO  
 R. Klecker, DRL  
 Hazel Smith, REG
