NUCLEAR SAFETY DISCUSSION PAPERS

Attached for information are the recently published Discussion Papers, "Potential Metal-Water Reactions in Light-Water-Cooled Power Reactors" (NSIC-23) and "Testing of Containment Systems Used with Light-Water-Cooled Power Reactors" (NSIC-26). These papers were prepared by Oak Ridge National Laboratory under the AEC's Nuclear Safety Research and Development Program. Additional copies of these papers are being sent to your staff under separate distribution by ORNL. Copies of the six other papers in the series will be sent to you as they become available.
