Ellis W. Merschoff, Acting Chief
Vendor Inspection Branch
Division of Nuclear Reactor Regulation
United States Nuclear Regulatory Commission
Washington, DC 20555

Subject: Defective E-Brite 26-1 Ferritic Stainless Steel Materials,
Manufactured by Airco Vacuum Metals, Inc., and Installed
Within Critical Nuclear Facilities

Regarding: Request for all File Documents Concerning Allegation
No. RIV-86-A-060-01

References: 1. HADCO, Nolan/NRC, Merschoff letter dated April 29, 1987
2. NRC, Merschoff/HADCO, Nolan letter dated May 19, 1987
3. HADCO, Nolan/NRC, Merschoff letter dated August 21, 1987

Mr. Merschoff:

I herewith request your immediate response in forwarding to me a full and complete file copy of all information within the N.R.C.'s files concerning or related to the above subject matter and references. This request includes all HADCO file documents furnished by me to the N.R.C. and all N.R.C. letters, transmittals, internal memorandums, file notes and/or any other information within the N.R.C. files concerning or related to my allegations or the above subject matter.

This information has been previously requested by me in References 1 and 3 above and was partially agreed to in your Reference 2 above. This information has been requested by a competent Congressional Committee for analysis and review. If any letters or requested documents requested herein are withheld, I respectfully request a formal denial from your immediate supervisor of any and all documents denied.

You stipulated in your referenced May 19, 1987 letter, you would provide me a file copy and keep me informed of ... "any significant findings". To date no information has been received and I am expanding my previous requests to include all information within the N.R.C. files pertaining to this subject matter. Based upon the N.R.C.'s unethical actions to date, I have no assurances that this nation has any possibility of surviving until the N.R.C. discovers any ... "significant findings".

Since the N.R.C. has an employee who is capable of reviewing ... "Approximately 2900 shipping records" ... in thirteen (13) hours, or at an average constant and non stop rate of approximately one order and shipping record per 16.14 seconds, I feel certain the N.R.C. has adequate and capable personnel competent enough to make rapid reporductions and response to this request.

Your immediate response is respectfully requested, anticipated, demanded and will be sincerely appreciated.

Thank you,

Harold L. Nolan
President
