Dr. Thomas E. Murley, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Attn: Document Control Desk

Subject: Braidwood Station Units 1 and 2
Application for Amendment To
Facility Operating Licenses NPF-72 and NPF-77
Appendix A, Technical Specifications
NRC docket Nos. 50-456 and 50-457

Reference (a): January 3, 1989 S.C. Hunsader letter
to T.E. Murley
(b): January 24, 1989 S.C. Hunsader letter
to T.E. Murley.

Dear Dr. Murley:

Pursuant to 10 CFR 50.90 reference (a) provided Commonwealth Edison's proposal to amend Appendix A, Technical Specifications, of Facility Operating Licenses NPF-72 and NPF-77. The proposed amendment requests a change to Technical Specifications 5.6.1 and 5.6.3 to allow the use of High Density Spent Fuel Storage Racks at Braidwood Station. Reference (b) provided additional information.

Attachment A to reference (a) provided the revised Technical Specification pages that included page 5-5. The purpose of this letter is to notify the NRC Staff that there is a correction required for that page. The storage capacity is being changed from "1060" fuel assemblies to "2870" fuel assemblies. Also, the east-west center to center distance between fuel assemblies placed in Region I spent fuel racks is "10.42 inches" not "10.46 inches" as given.

Attached to this letter is a corrected page 5-5 that includes all corrections made.

Please direct any questions you may have concerning this matter to this office.

Very truly yours,

S.C. Hunsader
Nuclear Licensing Administrator
