Gentlemen:

This refers to the inspection conducted by Messrs. A. B. Earnest and J. A. F. Kelly of this office during the period June 2-5, 1987, of activities authorized by NRC Operating License NPF-38 for Waterford 3 Steam Electric Station, and to the discussion of our findings with your staff at the conclusion of the inspection.

Areas examined during the inspection included security plan and implementing procedures, management effectiveness, security organization, security program audit, lighting, detection aids - protected area (PA), training and qualifications, alarm stations, compensatory measures, communications, and records and reports. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the NRC inspectors. The inspection findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

We have also examined actions you have taken with regard to previously identified inspection findings. The status of these items is identified in paragraph 3 of the enclosed report.

The material enclosed herewith contains Safeguards Information as defined by 10 CFR Part 73.21 and its disclosure to unauthorized individuals is prohibited by Section 147 of the Atomic Energy Act of 1954, as amended. Therefore, the material, with the exception of the report cover page which is an inspection summary, will not be placed in the Public Document Room.
