NRC Commissioners
United States Nuclear Regulatory Com.
Washington, D.C. 20555
Dear Sir;

I was really concerned, when I heard the licensing of Shoreham Nuclear Plant could be taken out of the hands of our local government. This is a nuclear plant opposed by the people of Suffolk County, County governments and New York State.

You can not ignore the facts and overlook the incidents of Chernobyl and closer to home Three Mile Island. When are we going to learn by our mistakes. Will we ever learn our lesson.

As a fellow Long Islander, I am concerned about its future and our families. You have no right to gamble with our lives and everyone else's. For instance, everyone is aware of the traffic problems on Long Island and the

city itself. Nobody is going to
convince me there is a safe
way to evacuate us. It is the
most absurd idea I ever heard.
A nuclear alarm would cause
the biggest chaos, you ever
would see.

So I say lets stop fooling
around and close down Stratham
for good. And let us preserve
our heritage for all our families.
Put an end to Nuclear power
and find other safer energy
resources.
