Attention: Mr. Bruce Mallet, Chief
Materials Licensing Section

Perry Nuclear Power Plant
Docket No. 50-440
Application for Byproduct
Material License for Offsite Use

Dear Mr. Mallett:

We are hereby submitting an application for a byproduct material license to use for future inspection, repair and testing of CEI reactor system and auxiliary system components at temporary field locations outside the Perry Unit 1 facility.

Response to items 5 through 11 of the application are found in Appendix A. Appendix B is an overall more detailed description of our proposed Radiation Safety Program at Field Facilities.

Exemption from the application fee is provided under 10 CFR 170.11(a)(3), since the need for the application is incidental to the Perry Nuclear Power Plant full power license, NPF-58.

Please feel free to contact me should you have any questions.

Very truly yours,

Murray R. Edelman
Senior Vice President
