Gulf States Utilities  
ATTN: Mr. James C. Daddens  
Senior Vice President (RBNG)  
P.O. Box 220  
St. Francisville, Louisiana 70775

Gentlemen:

This refers to the inspection conducted by J. Kelly of this office during the period December 12-16, 1988, of activities authorized by NRC Operating License NPF-47 for River Bend Station, and to the discussion of our findings with Mr. W. Odell and other members of your staff at the conclusion of the inspection.

The NRC inspection covered certain areas of your physical security program. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the NRC inspector. The areas inspected and the inspection findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

Two open items are identified in paragraphs 4 and 5 of the enclosed inspection report.

We have also examined actions you have taken with respect to previously identified inspection findings. The status of these items is identified in paragraph 2 of the enclosed report.

Our review of your response to Violation 498/8814-01 revealed that additional corrective action is needed to close this violation. Accordingly, please provide, within 30 days of the date of this letter, action to address the problems identified in paragraph 2.

We continue to have concerns regarding the matters discussed in Open Item 458/8814-02. We request that you review this item to evaluate the identified concerns.

The material enclosed herewith contains Safeguards Information as defined by 10 CFR Part 73.21 and its disclosure to unauthorized individuals is prohibited by Section 147 of the Atomic Energy Act of 1954, as amended. Therefore, the material, with the exception of the report cover page which is an inspection summary, will not be placed in the Public Document Room.
