Control No: 19194

Gentlemen:

On April 1, 1987, the Nuclear Regulatory Commission (NRC) revised its regulations (in entirety) to modify the process for licensing and regulating the medical use of radioactive byproduct material in 10 CFR 35.

Pursuant to this revision, we are requesting that you resubmit your renewal application dated August 29, 1985, in accordance with the revised regulations. We have enclosed a current copy of 10 CFR Part 35 and Regulatory Guide 10.8, Revision 2, "Guide for the Preparation of Applications for Medical Programs," dated August, 1987 which should assist you in completing this task.

We have also enclosed a copy of Regulatory Guide 10.5 which will be used to evaluate your broadscope activities. You may wish to reevaluate those portions of your application which address licensed activities conducted under 10 CFR Part 33 to make sure that previously submitted referenced documents are accurate.

We will continue our review of your application upon receipt of this information. Please reply in duplicate, within 90 days, and refer to Control Number 19194.

If you have any questions or require clarification on any of the information stated above, you may contact us at (312) 790-5625.

Sincerely,

8903020458 890206
