MARVIKEN EXPERIMENTS FOR 1973-1977

We have received a proposal for a new series of experiments to be conducted in the Marviken (Swedish) facility under an international participation and management arrangement similar to the recently completed series of Marviken blowdown experiments now being analyzed. A recent telegram from our AEC office in Brussels indicates this proposal will be considered at the meetings of the Marviken Technical Project Committee and Management Board, August 6-7, 1973. You are invited to attend or send a representative to a meeting in my office at 10:00 a.m., Tuesday, July 31, 1973, to discuss this proposal. I will, in the meantime, learn as much as possible about the details of the proposed program, costs, prospective participants, etc.
