CRACKS IN FEEDWATER SPARGERS IN THE KKM NUCLEAR STATION GE-BWR

The enclosed letter from the Swiss regulatory office (F. Weehuizen) describes experience they are having with feedwater spargers in their BWR at Muhleberg, and requests our advice on this matter. This information may be interesting and useful to you. I would appreciate your giving it your early attention and sending me your recommendations, for advice to the Swiss, by March 8, 1974.
