BRUNSWICK STEAM ELECTRIC PLANT, UNIT NOS. 1 AND 2  
DOCKET NOS. 50-325 & 50-324/LICENSE NOS. DPR-71 & DPR-62  
SUPPLEMENT TO REQUEST FOR LICENSE AMENDMENT  
PRIMARY CONTAINMENT ISOLATION VALVE TESTING CONDITIONS

Gentlemen:

On August 29, 1986, Carolina Power & Light Company (CP&L) submitted a request for a license amendment for the Brunswick Steam Electric Plant (BSEP) Units 1 and 2 regarding Technical Specification Table 3.6.3-1. The proposed change permits the operability of primary containment isolation valves listed in Table 3.6.3-1 to be verified while the unit is in OPERATIONAL CONDITIONS other than cold shutdown or refueling. In that submittal, a one-time extension to the requirements of Surveillance Requirement 4.6.3.4 was inadvertently omitted from Technical Specification page 3/4 6-13 for BSEP-1. Enclosed is a revised page correcting the oversight.

Please refer any questions regarding this matter to Mr. Stephen D. Floyd at (919) 836-6901.

Yours very truly,

S. R. Zimmerman  
Manager
