

OLIVER D. KINGSLEY, JR.
Vice President
Nuclear Operations

October 2, 1987

U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Attention: Document Control Desk

Gentlemen:

SUBJECT: Grand Gulf Nuclear Station
Unit 1
Docket No. 50-416
License No. NPF-29
Safety Issues Management System
AECM-87/0186

On September 2, 1987, the Nuclear Regulatory Commission (NRC) sent to System Energy Resources, Inc., (SERI) a report of Safety Issues Management System (SIMS) items pertinent to Grand Gulf Nuclear Station. SERI was requested to supply implementation dates for closed tasks, estimated implementation dates for open tasks as well as verification of NRC supplied implementation dates and identification of any omitted significant actions.

A mark up of the SIMS report with SERI supplied implementation dates is attached. An advance copy of the attachment was provided to the NRC Project Manager, Mr. L. L. Kintner, on September 30, 1987. Dates for tasks still open are to be considered best estimate forecasts and not commitments.

Due to the brief time allowed by the request, SERI has not conducted a detailed review to identify possible omitted significant actions and does not have actions to add to SIMS at this time. However SERI periodically meets with the NRC staff to discuss the status of ongoing and planned activities. These meetings have and will continue to provide both SERI and the NRC with timely information on planned activities and the status of ongoing activities.

The next SERI-NRC meeting has been tentatively scheduled for the week of October 19, 1987. SERI will advise Mr. Kintner at that meeting of any items that should be added to the attached SIMS report based on GGNS long term work planning documentation.

If you have any questions please advise.
