License No. 24-01113-03

30-5069

Gentlemen:

This refers to the routine safety inspection conducted by Ms. T. L. Simmons of this office on January 31, 1989, of activities authorized by NRC Byproduct Material License No. 24-01113-03 and to the discussion of our findings with you at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

In addition to the above areas, the inspector examined actions taken regarding apparent violations found during our April 10 and 11, 1985 inspection. We have no further questions regarding these matters.

No violations of NRC requirements were identified during the course of this inspection.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

D. J. Sreniawski, Chief  
Nuclear Materials Safety
