ADDITIONAL RESPONSE TO NOTICE OF VIOLATION (NRC INSPECTION REPORT NO.
50-312/87-02)

Dear Mr. Martin:

By letter dated March 3, 1987, the Nuclear Regulatory Commission issued a Notice of Violation concerning activities at the Rancho Seco Nuclear Generating Station. The District responded to the Notice of Violation by letter, dated April 3, 1987. The response letter acknowledged the violation cited and described the District's intended corrective actions for each specific item listed in the Notice of Violation.

On June 24, 1987, Mr. Ross Scarano of the Commission requested the District to provide further clarification of our April 3, 1987, response regarding the actions that have been taken by Security to enhance communication with plant management.

The District has thoroughly evaluated the communication breakdown during the December 30, 1986 bomb threat, and has determined that Security's failure to fully inform plant management of the degree of activation of the Security Plan was a random personnel error and not of a recurring nature. The responsible security officer has since terminated employment at the Rancho Seco Nuclear Generating Station.

Security Contingency Procedures for both a bomb threat and declaration of a security alert clearly require prompt and complete notification of the shift supervisor. Training on these procedures is an inherent part of the Security Officer Training Program.

- 2 -

The District has improved overall Security/Plant communications by requiring an officer to report directly to the Shift Supervisor during an emergency to function as a communication link with the Watch Commander and Central and Secondary Alarm Stations. This facilitates the prompt and complete transmittal of information between Security and the Plant.

The District considers that the above actions adequately address this matter. If you should have additional questions, please contact Mr. Ron W. Colombo at (916) 452-3211, extension 4236.

Sincerely,

A handwritten signature in cursive script, appearing to read "G. Carl Andognini".

G. Carl Andognini
