Gentlemen:

We have reviewed your letter dated September 22, 1987, and have no objection to your painting some of the rooms in Building C and using them for offices and other activities which do not involve radioactive materials. You have indicated in your radiological survey report for Building C that the contamination levels in the building were below the Nuclear Regulatory Commission release limits. However, Building C will not be released for unrestricted use until the results of NRC's confirmatory survey are finalized.

Sincerely,

Jerry J. Swift, Section Leader
Uranium Fuel Section
Fuel Cycle Safety Branch
Division of Industrial and Medical
Nuclear Safety, NMSS
