U.S. Nuclear Regulatory Commission
Attention: Document Control Desk
Washington, D.C. 20555

Subject: Crystal River Unit 3
Docket No. 50-302
Operating License No. DPR-72
Updated NRC Incoming Correspondence and Signature
Authorization

Florida Power Corporation has made organizational changes over the past several months which effect the standard recipients of incoming NRC correspondence and those authorized to submit outgoing correspondence. This correspondence is provided to request changes to your standard distribution(s) and to let you know from whom you can expect to receive docketed items.

The most recent change is the election of Mr. G.L. (Gary) Boldt to Vice President, Nuclear Production. His responsibilities include Plant Operations, Training and Site Support. He will be the primary officer associated with Licensing and Training issues and will be signing that correspondence associated with Operator License Applications, License Amendment Requests, etc., although I may also do so should the need arise. The authority to sign other correspondence is delegated to other appropriate management internally. These currently include J.F. Dalonzo for Fingerprint related submittals; and, Rolf C. Widell and K.R. Wilson for Licensing submittals. Also, included is a change to the Citrus County Board of Commissioners address.
