SUBJECT: REQUEST FOR REVIEW OF NUMARC-8700, GUIDELINES AND TECHNICAL
BASES FOR NUMARC INITIATIVES ADDRESSING STATION BLACKOUT AT
LIGHT WATER REACTORS," REVISION 0.0, AUGUST 31, 1987

Enclosed is a copy of NUMARC-8700 for your final review and comment. The contents of this report contain the subject matter previously contained in NUGSBO reports NUGSBO-8710, -8720 and -8750 and reflect the NRC staff's concerns and identified requirements from our August 1987 meetings.

Please review this report carefully to ensure that your technical concerns are adequately addressed and provide me with "markups" of the pages requiring revision by September 9, 1987. We will meet with the NUGSBO staff on September 11, 1987 to resolve any concerns that you may have in order to ensure that this document is technically adequate for referencing in the proposed RG 1.155 for resolution of USI A-44..

Please obtain the necessary approval from your respective supervision so that this review request can be met on time. Let me know if there are competing requirements immediately. This review is necessary to assure that the resolution package for USI A-44 can be transmitted to the EDO in September 1987.
