File No. 9-87-22

Re: Peach Bottom Investigation

M. J. Haas and R. L. Sweeney interviewed ([REDACTED]) today. I spoke to him after he volunteered information that a Nuclear Regulatory Commission representative was reported to have been observed nodding off to sleep in the Control Room. He has no firsthand input and related information on the basis of conversations he overheard in the Control Room. He does not know the identity of the persons having the conversation. The applicable time frame occurred shortly before or after the March 31, 1987 shutdown. He has no other input or anything to offer about the Nuclear Regulatory Commission.

I advised him that I would pass this information to the Nuclear Regulatory Commission. He had no objection.

I believe he may be referencing the observations made by Unit 3 Operator ([REDACTED])

At 4:15 pm this date I telephoned Mr. Mulley's office and gave the above details to his secretary.
