Dear Betty:

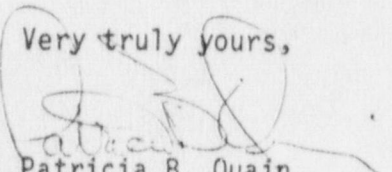

Per our phone conversation of today, enclosed are the revised export license applications, each pertaining to one of the above referenced reactors for the following material:

- 429.000 Kgs Uranium 235, contained in 12985.000 Kgs Uranium, in the form of Uranium Hexafluoride, enriched to a maximum 3.30% U235

Please note that Transnucleaire, S.A. advises that the conversion of this material will be handled by FBFC, either in Pierrelatte or Romans, France.

If you have any questions, or need additional information, please don't hesitate to contact me.

Very truly yours,

Patricia B. Quain
Traffic Coordinator
