Two LERO Plan Changes
Shoreham Nuclear Power Station
Docket No. 50-322 - 06-3

LILCO submits the following two changes to the Local Emergency Response Organization (LERO) plan. These changes are:

1. The LERO liaison to Suffolk County will report to the Suffolk County Emergency Operations Center or other location selected by Suffolk County representatives upon the declaration of an Alert or higher emergency classification at the Shoreham Nuclear Power Station. The liaison will bring a copy of the LERO plan and procedures, communications equipment, and other equipment and displays necessary to the role of county liaison. This person will be available to aid and assist the County Executive.
2. During Shoreham operations at above 5% of rated power level, a person will be in the Brentwood Operations Center at all times who is trained to convert the Center into the LERO Emergency Operations Center. This person will begin the conversion at the declaration of an Alert or higher emergency classification at the Shoreham Nuclear Power Station.

The plan and procedure pages affected by these changes are attached to this letter. We ask that the NRC request FEMA to review this material pursuant to the NRC/FEMA Memorandum of Understanding. LILCO will submit a larger revision to the LERO plan in May as agreed with FEMA. That revision will contain the changes described in our letters SNRC-1563 and 1518.
