Thomas E. Baca, M.P.H., Director

OFFICE OF THE DIRECTOR

May 14, 1982

Mr. D. Walker
General Manager
Mobil Oil Corporation
Uranium/Minerals Division
P. O. Box 5444
Denver, CO 80217

Dear Mr. Walker:

Reference Mobil Oil Corporation letter dated November 10, 1980 to the Radiation Protection Bureau (RPB) requesting the issuance of a Radioactive Material License.

Materials necessary to initiate a detailed technical review have been received by the RPB. The materials are in the proper format and appear to be adequate.

You are hereby notified that your application for a Radioactive Material License, as of this date has been accepted for formal review by the Bureau. Acceptance of this application for formal review does not imply that the application is licensable, nor does it preclude the probability of additional technical information being required from Mobil. The public will be informed by written announcement that your application and associated material is available for review at the Environmental Improvement Division office locations in Santa Fe, Albuquerque and Milan, New Mexico.

A formal written analysis of your application will be completed by our office which will be available prior to any licensing action by the Division. The analysis will recommend approval or disapproval of the application. If significant public interest is shown in your application or if issues of concern cannot be resolved in writing, the Director may require a public hearing around September 1982.

WJB
Conf. Rm. for review.
