

November 4, 1987

Docket No. 50-341

Mr. B. Ralph Sylvia
Group Vice President
Nuclear Operations
Detroit Edison Company
6400 North Dixie Highway
Newport, Michigan 48166

Dear Mr. Sylvia:

SUBJECT: TRANSMITTAL OF SAFETY EVALUATION REPORT RELATIVE TO FERMI-2
CONFORMANCE WITH NRC GENERIC LETTER 82-28, ITEM 2.2.1
(TAC NO. 64102)

NRC Generic Letter 83-28 (July 8, 1983), Item 2.2.1, required Detroit Edison in part to describe in detail the Fermi-2 program for classifying all safety-related components other than RTS components as safety-related on documents and in information handling systems that are used to control plant activities that may affect those components. The staff and its consultant, Idaho National Engineering Laboratory, EG&G, Inc., have completed their review of your response to Item 2.2.1, submitted by letter dated November 3, 1983. Our consultants' Technical Evaluation Report, EG&G-NTA-7205, which finds your response acceptable, and the NRC staff's Safety Evaluation Report concurring with EG&G's findings, is enclosed.

Please note that we are still reviewing your response to Item 2.2.2 and as such, our determination of Detroit Edison's conformance with Generic Letter 83-28, Item 2.2 cannot be considered complete. We will advise you of our findings with respect to Item 2.2.2 at a later date.

Original signed by

John J. Stefano, Project Manager
Project Directorate III-1
Division of Reactor Projects - III, IV, V
& Special Projects

Enclosure:

1. Safety Evaluation Report
Re: G.L. 83-28, Item 2.2.1
2. Technical Evaluation Report
No. EGG-NTA-7205
