

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

SEP 30 1986

MEMORANDUM FOR: William D. Hutchison, Operations Officer
Office of Investigations

FROM: Michael S. Kearney, Project Manager
Regulatory Improvements - Materials Licensing

SUBJECT: NMSS TECHNICAL STAFF REVIEW OF SEQUOYAH FUELS
CORPORATION (SFC) INVESTIGATION TRANSCRIPTS

*2634/James -
Base file
for record with
case 22*

This is to confirm our telephone conversation of September 30, 1986, in *274-86-665* which you responded to my request of earlier that day, for certain members of our technical staff to be provided access to the transcripts of the SFC investigation. Your response, which had been coordinated with the Deputy Director of OI, was, based on the authority of the Director of OI, that the transcripts were released for the technical staff to review, for the purpose of identifying and following up on potential safety concerns identified in the interviews. The staff will primarily review the exhibits resulting from the interviews with the SFC operators and supervisors. The exhibits will be returned to Richard J. Goddard, OGC. Copies will not be made.
