SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION (CPSES)  
DOCKET NOS. 50-445 AND 50-446  
EQUIPMENT QUALIFICATIONS  
SDAR: CP-87-36 (INTERIM REPORT)

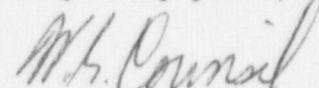

Gentlemen:

On July 15, 1987, we verbally notified your Mr. Ian Barnes of a deficiency involving evaluations which indicate that the vendor equipment qualification reports for equipment furnished in accordance with several Balance of Plant project specifications contain deficiencies and discrepancies. This is an interim report of a potentially reportable item under the provisions of 10CFR50.55(e).

Our evaluation of this issue includes a program to compare specific plant service conditions with the applicable test documents. The results of this program are needed to determine the impact of this issue upon the safety of plant operations.

We expect to submit our next report on this issue by November 23, 1987.

Very truly yours,

  
W. G. Council
