RE: REPLY TO NOTICE OF VIOLATION

Docket No. 030-31644

License No. 06-28504-01

In response to a "Notice of Violation", dated June 11, 1998, issued as a result of an inspection conducted on May 6, 1998, we offer the following comments:

- A) The reason for the violations was that we were unaware of the regulations.
- B) Regarding hazmat training, all our users are scheduled to receive the required training, but until completed, only users which have received training will transport guage. The estimated date of compliance with this requirement is August 1, 1998. Since we anticipate minimal usage within this period, this time frame is not a problem for us.
- C) Regarding blocking and bracing, we have added the requirement to our procedures, all users have been informed of this added procedure and have been given the new policy in writing. We have been in compliance with this requirement since June 22, 1989.

We trust these adjustments to our radiation safety program are acceptable.

Sincerely,

A handwritten signature in black ink, appearing to read "John F. Treichel", written over a horizontal line.
