Docket No. 50-245

B12735

Re: ISI and IST Program

U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D.C. 20555

Gentlemen:

Millstone Nuclear Power Station, Unit No. 1
Extension of Inservice Inspection and
Testing Program, Second Ten-Year Interval

The Millstone Unit No. 1 Inservice Inspection and Testing Program for the second ten-year interval started on December 28, 1980 and is due to be completed on December 28, 1990. In accordance with the ASME Boiler and Pressure Vessel Code, Section XI, 1980 Edition, including the Winter 1980 Addenda, and the latest approved editions and addenda, Millstone Unit No. 1 will be extending the second ten-year interval by up to one year as allowed by Subarticle IWA-2400. The new completion date for the second ten-year interval will be the completion date of the 1991 refueling outage, which is tentatively scheduled for May 1991.

Northeast Nuclear Energy Company considers this extension to be compliant with the rules and regulations governing this program and is providing this submittal to ensure your awareness of our action. As such, no NRC Staff response is necessary.

If you have any questions on this issue, please feel free to contact my staff.

Very truly yours,

NORTHEAST NUCLEAR ENERGY COMPANY
