BRUNSWICK STEAM ELECTRIC PLANT, UNIT NOS. 1 AND 2  
DOCKET NOS. 50-325 & 50-324/LICENSE NOS. DPR-71 & DPR-62  
SUPPLEMENT TO REQUEST FOR LICENSE AMENDMENT  
INTERNAL TORUS DESIGN TEMPERATURE (TAC NOS. 65932 & 65933)

Gentlemen:

On June 24, 1987, Carolina Power and Light Company submitted a request for a license amendment for the Brunswick Steam Electric Plant, Units 1 and 2 to correct a reference in Technical Specification (TS) 5.2.2(b) on page 5-1 which related to the maximum internal torus temperature. Amendments 113 and 140, which were subsequently issued on October 27, 1987, also affected TS page 5-1; however, they did not directly affect the change proposed on June 24, 1987.

The Company has reviewed the changes made to the proposed change due to incorporation of the amendments and has determined that the significant hazards analysis originally submitted has not been affected.

Enclosure 1 contains a revised TS page 5-1 for each unit which incorporates the amendment issued on October 27, 1987 along with the proposed changes made in the June 24, 1987 submittal. Please replace the existing TS pages associated with the June 24, 1987 submittal with those in Enclosure 1.

Please refer any questions regarding this submittal to Mr. Stephen D. Floyd at (919) 836-6901.

Yours very truly,

S. R. Zimmerman  
Manager
