July 21, 1998

Dear Dr. Williamson:

On July 8, 1998 the Management Review Board (MRB) met to consider the proposed final Integrated Materials Performance Evaluation Program (IMPEP) report on the Alabama Agreement State Program. The MRB found the Alabama program adequate to protect public health and safety and compatible with NRC's program.

Section 5.0, page 12, of the enclosed final report presents the IMPEP team's recommendations and suggestions. We have received the June 16, 1998 letter from Kirksey E. Whatley, Director, Division of Radiation Control, which described the actions taken in response to the team's recommendations and suggestions. We request no additional information.

Based on the results of the current IMPEP review, the next full review will be scheduled in four years.

Mr. Whatley effectively represented the State of Alabama at the MRB meeting. During the meeting, he noted the current and past contributions from radiation control program staff and management that have been key to the success of the Alabama program. The MRB also noted the commitment from Mr. Whatley to continue the use of high performance standards in the conduct of his program's activities.

I appreciate the courtesy and cooperation extended to the IMPEP team during the review and your support of the Radiation Control Program. I look forward to our agencies continuing to work cooperatively in the future.

Sincerely,
