

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

November 20, 1987

CHAIRMAN

The Honorable Gerry E. Studds
United States House of Representatives
Washington, D. C. 20515

Dear Congressman Studds:

I am responding to your September 17, 1987 letter, in which you and Senator Kennedy urged the Nuclear Regulatory Commission to convene a formal and comprehensive hearing on the restart of the Pilgrim Nuclear Power Station. The Commission is fully aware of public concern regarding restart of the Pilgrim facility and has gone to unusual lengths to assure broad public participation in the restart decision.

The NRC staff and local officials in Massachusetts have engaged in a continuing dialogue on the Pilgrim situation. This dialogue has included at least three public meetings with the Plymouth Board of Selectmen, as well as meetings with the Plymouth Chamber of Commerce, the Duxbury Board of Selectmen, the Massachusetts Joint Committee on Energy, the Massachusetts Legislative Committee on the Investigation and Study of the Pilgrim Station, the Town of Plymouth Advisory Committee on Nuclear Matters, and others. Most recently, the NRC staff participated in a public forum on the Pilgrim situation at the Duxbury High School on October 29, 1987. This meeting was sponsored by the Duxbury Board of Selectmen.

Representatives from some of these groups also have participated in NRC Region I management meetings dealing with the Pilgrim facility, including the Systematic Assessment of Licensee Performance (SALP) meeting held on May 7, 1987. On October 8, 1987, the NRC met with representatives of the Commonwealth of Massachusetts in our Region I office. This meeting, which was open to the public, was held to discuss agenda items proposed by the Commonwealth, including emergency preparedness issues, the status of various NRC technical reviews, and inspection activities expected in the next few months.

As the NRC proceeds with deliberations regarding restart of the Pilgrim reactor, additional public meetings will be held in lieu of the evidentiary hearing you have requested. These meetings will be formal, transcribed sessions where the public's testimony will be heard by NRC management. The following meetings are planned:

B712080320 B71120
PDR COMMS NRCC
CORRESPONDENCE PDR

1. A meeting will be held in the Plymouth area to receive public comments on the Boston Edison Restart Plan. This meeting will be scheduled after the NRC has received the details of the entire plan and after it has been placed in local libraries for public review. NRC staff will also accept written testimony from those unable to attend the meeting. NRC will consider these comments, as appropriate, for enhancing NRC review and inspection activities.
2. A second public meeting will be held in the Plymouth area to discuss the disposition of comments and concerns raised during the first meeting.
3. Before a position on restart of the plant is developed in final form, a public meeting will be held between NRC senior staff and State Senator William Golden and the other petitioners who submitted the July 1986 10 CFR 2.206 Petition. This meeting will discuss NRC's actions regarding the Pilgrim plant and answer questions of the petitioners.

Other public meetings, including those with Boston Edison, will be held as circumstances warrant. These meetings will be announced pursuant to NRC staff policy on open meetings (43 FR 28058). After the staff completes its reviews and before the NRC allows Pilgrim to restart, the Commission will hold a meeting to be briefed by the staff on the readiness of Pilgrim to resume operations.

The Commission believes it has demonstrated its commitment to comprehensive public participation in the Pilgrim restart decision. Moreover, it is our view that when the series of planned meetings is completed, we will have heard and considered the views of more concerned citizens than would have been likely in a formal hearing.

Sincerely,

Lando W. Zech, Jr.
