DEC 8 1987

Louisiana Power & Light Company
ATTN: J. G. Dewease, Senior Vice President
Nuclear Operations
317 Baronne Street
P.O. Box 60340
New Orleans, Louisiana 70160

Gentlemen:

This refers to the inspection conducted by Messrs. W. F. Smith and T. R. Staker of this office during the period October 16 through November 15, 1987, of activities authorized by NRC Operating License NPF-38 for the Waterford Steam Electric Station, Unit 3, and to the discussion of our findings with Mr. N. S. Carns and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included onsite followup of events, operational safety verification, monthly maintenance observation, monthly surveillance observation, followup of previously identified items, licensee event report followup, and plant status. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the NRC inspectors. The inspection findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations were identified.

We have also examined actions you have taken with regard to previously identified inspection findings. The status of these items is identified in paragraph 6 of the enclosed report.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Original Signed By
L. J. Callan

L. J. Callan, Director
Reactor Projects Division
