Dear Sir:

Trojan Nuclear Plant Security Plan
Revisions 17 and 18

On May 20, 1987, Revision 17 to the Trojan Nuclear Plant Security Plan, PGE-1017, was submitted to the Nuclear Regulatory Commission (NRC) for review and approval under the provisions of Part 50.90 of Title 10 of the Code of Federal Regulations (10 CFR 50.90). On December 7, 1987, the NRC approved Revision 17. Attachment 1 contains four copies of the replacement pages for PGE-1017. Another two copies are being forwarded to the Regional Administrator, Region V.

In accordance with the provisions of 10 CFR 50.54(p), Revision 18 has been implemented in PGE-1017. Our evaluation has determined Revision 18 does not decrease the safeguards effectiveness of the security program. Attachment 2 contains a detailed description of the changes, along with a discussion of the reasons for making the changes. Attachment 3 consists of four copies of the replacement pages for PGE-1017. Another two copies are being forwarded to the Regional Administrator, Region V.

Attachments 1, 2, and 3 contain Safeguards Information of a type specified in 10 CFR 73.21.

Sincerely,
