Frank Pavlechko
Director, Emergency Planning
Simulator Building
Post Office Box 4
Shippingport, PA 15077

50-334

Dear Mr. Pavlechko:

This is to confirm our intent to conduct a survey of your emergency data system capabilities for possible use as part of an Emergency Response Data System (ERDS). As I discussed with you, a team of two individuals (one NRC and one contractor) will visit your facility to conduct the survey. If acceptable, we will start with a brief introductory meeting followed by the survey of your available data and computer characteristics. For your information, I am enclosing a list of the individuals we expect we need to speak with, and a copy of the ERDS survey checklist to be used during the visit. Please realize that not all items on the checklist will apply to your facility. It deals with a broad spectrum of systems, because it was intended to cover all licensed nuclear reactors. If you have any questions, please contact me on (301) 492-4155.

Sincerely,

151

John B. Hickman
