DOCKET NO. 50-312
RANCHO SECO NUCLEAR GENERATING STATION
LICENSE NO. DPR-54
SAFETY PARAMETER DISPLAY SYSTEM (SPDS) SUPPLEMENTAL INFORMATION

Dear Mr. Miraglia:

As a result of discussions with your staff, additional information was requested to provide sufficient detail on the SPDS. Pursuant to this request, Attachment 1 provides a copy of the SPDS block diagram. In addition, the staff is requested to docket the documents listed in Attachment 2. These were provided to the staff during the October 26-28, 1987 audit.

A telephone call with your staff on December 3, 1987 indicated that clarification of the seismic qualification of the SPDS was necessary to complete your review. Attachment 3 provides additional information on the seismic qualification of the SPDS components. It is our understanding that this information is sufficient to provide the clarification requested by your staff.

In our letter dated November 20, 1987, the District indicated it would provide the first quarterly performance report 3 months after full power operation. It is our understanding that the staff would rather have the first report 3 months after reactor criticality. Accordingly, the District will submit the first quarterly SPDS performance report consistent with the requested schedule.
