

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
REGION I  
631 PARK AVENUE  
KING OF PRUSSIA, PENNSYLVANIA 19406

17 JUN 1986

MEMORANDUM FOR: Ben B. Hayes, Director, Office of Investigations

FROM: Thomas E. Murley, Regional Administrator  
Region I

SUBJECT: PEACH BOTTOM ATOMIC POWER STATION (PBAPS): REPORT OF  
INVESTIGATION (1-85-019) ALLEGED THREATS TO EMPLOYEES  
TO PREVENT DISCLOSURE OF POSSIBLE OVEREXPOSURE TO NRC

The subject report, dated May 8, 1986, has been received and reviewed by Region I. The issues disclosed by the investigation were presented to the licensee by forwarding the Report Synopsis and conducting an enforcement conference on May 30, 1986.

In our enforcement deliberations, Region I has found that the best results are obtained when the licensee is given all the facts in an inspection report prior to an enforcement conference and the licensee is given an opportunity to address those facts during an enforcement conference in advance of an enforcement decision.

In this case, Region I has similarly determined that in order to provide for proper review and disposition of the potential enforcement issues, it is necessary to release the Report of Investigation and Exhibits (1-85-019) to the licensee in order to afford the licensee an opportunity to address the reports findings prior to an enforcement decision.

In accordance with your May 8, 1986 letter, Region I formally requests permission of the Director, OI, to release the subject report and exhibits to the licensee and the Public Document Room.
