SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION (CPSES)
DOCKET NOS. 50-445 AND 50-446
WEATHER PROTECTION FOR CLASS 1E COMPONENTS
SDAR: CP-86-68 (INTERIM REPORT)

Gentlemen:

On October 2, 1986, we verbally notified your Mr. I. Barnes of a deficiency regarding provisions for weather protection of Class 1E components used in outdoor installations. This is an interim report of a potentially reportable item under the provisions of 10CFR50.55(e). Our most recent interim report was logged TXX-6590, dated July 24, 1987.

Issuance of Procedure CPE-FVM-EE-054, "FVM to Acquire Data on Weatherproofing of all Outdoor Class 1E Terminal/Junction Boxes and Associated Conduit Fittings", has been delayed to incorporate corrective actions required by other related issues.

We are continuing our evaluation and will submit our next report on this issue no later than October 23, 1987.

Very truly yours,

W. G. Council
