License No. 34-24743-01

Gentlemen:

This refers to the routine safety inspection conducted by Mr. J. L. Lynch of this office on July 28-30, 1987, of activities authorized by NRC Byproduct Material License No. 34-24743-01 and to the discussion of our findings with Mr. D. McConahy at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

In addition to the above areas, the inspector examined actions described in your letter dated April 29, 1987, regarding apparent violations found during our March 12, 1987, inspection. We have no further questions regarding these matters.

During this inspection, certain of your activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice. A written response is required.

In addition to our concern for corrective action with respect to the specific violation noted, we would like to reemphasize our concern for the continuity of your radiation safety program. Please describe in your response to this letter, the methods to be utilized by your radiation safety officer to ensure that proper levels of radiation safety are maintained at both your Ohio and Michigan facilities.

The responses directed by this letter and the accompanying Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
